So another category of accessories — mountless, cable-based charging and audio solutions — has continued to flourish, with companies such as Belkin, Griffin, and Kensington leading the way.. Frequent car swappers, such as users of rental cars, also need greater flexibility, since they mightn't know where such accessories will mount or connect from vehicle to vehicle.. All-in-one iPod charging, mounting, and audio solutions for cars have been popular over the last several years, but one-size-fits-all mounts don't work so well in some cars.. The most car compatible solution, notably popularized by Kensington, let you broadcast your iPod's audio to any car stereo with an FM radio built in, while keeping your iPod juiced up from a cigarette lighter port; it didn't use wires to connect in any other way to the stereo.
