This extremely strong influence can bring change, dilemmas or separation. The likelihood of travel in connection with these issues is strong.
This is a dramatic time of change which favors those who are willing to take a risk concerning the future, but upsets those who would prefer things to continue as they are. Now is the time to make some revolution in your life by grasping modern trends and setting out on untrodden paths. If economic safety and job security are your main priorities, you could be in trouble. Unpredictable things can happen now because change is on the agenda. If you take an objective view of what you are doing now, you will almost certainly see that if some kind of renewal doesn't take place, you will die of boredom. Do not avoid necessary change now - you should be prepared to make daring and radically new decisions - let yourself be swept along by the excitement of the times.
Opportunities now are connected with greater freedom and independence. You can drop work which restricts your movements and consider more flexible working hours. This is a favorable period for freelance work, or temp work which gives you more time to do the things which really interest you. Working with new technology, computers, fax and modern communication is particularly favored. If you have New Age interests, this is the time to really go for them. You may find yourself traveling more internationally, or getting involved with foreigners. Humanitarian issues can be important.
